

Kavishka Jayathilake

Colombo 08, Sri Lanka | kavishkajayathilake04@gmail.com | +94 703144967 | linkedin.com | github.com

Professional Summary

Motivated and detail-oriented Computer Science undergraduate with an **ISTQB® CTFL** certification and a strong interest in Software Quality Assurance. Familiar with **Automation Testing**, manual testing, defect tracking, and test case design. Eager to apply academic knowledge and project experience in real-world QA environments. Proficient in tools such as Jira, Postman, Jenkins, and SQL, with a foundational understanding of test planning, API testing, and agile workflows. Seeking a QA Job opportunity to contribute to improving software quality while gaining hands-on experience in testing processes and industry practices.

Work Experience

ORANGEHRM Automation QA Engineer Intern

2025 – Present

Automation Testing

- Developed and maintained Playwright automation tests in TypeScript, leveraging MCP browser tools and AI-assisted healing agents to accelerate test creation and reduce maintenance time.
- Automated E2E and regression test cases for the OrangeHRM product-based system.
- Created reusable test data and API-based prerequisite setup for stable and repeatable test execution.
- Used MCP browser tools to inspect live UI behavior, validate selectors, and reduce debugging time.
- Used healer/auto-healing workflows to identify failures, fix unstable selectors, and reduce automation maintenance time.
- Created and used specialized AI agents and sub agents for test generation, debugging, healing, and quality validation to speed up automation delivery.

Manual Testing

- Created and executed manual test cases based on business requirements.
- Reported defects with clear steps, evidence, and expected vs actual results.
- Performed functional and regression testing for HR application workflows.

Field Survey Assistant

2024

- Santa Lanka Survey Company – [Colombo, Sri Lanka]

Education

University of Colombo School of Computing , BSc in Computer Science	2023 – 2026
Kegalle Vidyalaya, Kegalle , G.C.E A/L (1A / 2B)	2019 – 2022
Esoft Metro Collage , Diploma in English,Diploma in IT	2022 – 2023
Kegalle Vidyalaya.Kegalle , G.C.E O/L (8A,C-English literary)	2017

Projects

Leafground Demo Site Test Automation

2025

- Developed and executed automated test scripts to test the elements and functionality of the web application
- Technologies Used: Java, Selenium WebDriver, TestNG

API Testing Framework with CI/CD Pipeline

2026

- Built a fully automated API testing framework using Postman, Newman, and Jenkins, achieving 100
- Implemented CI/CD pipeline with Jenkins and GitHub Poll SCM, enabling automated test execution on every code push.
- Designed and executed 280 automated test cases covering Smoke, Regression, Data-Driven, and Negative testing scenarios.

- Integrated JUnit reporting for test result visualization and Jenkins dashboard integration.
- Utilized data-driven testing with CSV files to efficiently test 10 different scenarios using a single script.
- Technologies Used: Postman, Newman, Jenkins, Git, GitHub, Node.js, JUnit

UniRoute 2025

- University 3rd-year group project; a web platform designed to help students identify the best university and career path based on their interests and academic background
- Technologies Used: React.js, Material-UI, Python Django, MySQL

QuickChat 2025

- Real-time chat application enabling secure user authentication and messaging between users
- Prepared a comprehensive manual testing report to ensure quality.
- Technologies Used: React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Vite

Real Estate Web Application 2024

- Property listing platform with real-time notifications and user authentication
- Technologies Used: React.js, Node.js, Express.js, MongoDB, WebSockets

GramaLink 2023

- 2nd-year group project which Built a web platform to digitalize Grama Niladhari's administrative tasks.
- Prepared a comprehensive manual testing report to ensure quality.
- Technologies Used: HTML, CSS, JavaScript, PHP, MySQL

Network Utilities Suite (Python) 2025

- Developed a real-time network bandwidth monitor with dual interface (CLI/GUI) to track live usage, CPU, and RAM.
- Engineered an Encrypted Chat Application using RSA public-key cryptography for secure client-server messaging.
- Technologies Used: Python, RSA, Socket, Threading, psutil, Rich, Tkinter

Technical Skills

Programming Languages: C,C+ +, TypeScript, PHP, Python, Java,Scala, JavaScript

Web Development: HTML, CSS, React.js, Django, Express.js, Node.js

Databases: MySQL, MongoDB , MariaDB

Test Automation: Playwright, Selenium , TestNG, Cypress, Postman, Newman

Tools & Technologies: GitHub, Jira, Postman, Jenkins, GitHub Actions, CI/CD

Courses & Certifications

- ISTQB® Certified Tester Foundation Level (CTFL) v4.0 – ISTQB
- Postman API Fundamental student expert – Postman
- Test Automation Foundations – LinkedIn Learning
- Software Testing Foundations: Test Techniques – LinkedIn Learning
- Selenium Essential Training – LinkedIn Learning
- Learning TestNG – LinkedIn Learning
- Advanced Cypress – LinkedIn Learning
- Learning Java 11 – LinkedIn Learning
- Introduction to Software Testing –Simple Learning
- AWS Educate Introduction to Cloud 101 – Amazon Web Services (AWS)

Core Competencies

Soft Skills: Team Collaboration, Critical Thinking, Communication, Problem Solving, Creativity, Adaptability
